AND RIVER PLATE NEWS.

No 3,005—Twelfth Year | BUENOS AYRES, FRIDAY, MAY 24, 1872. | Circulation, 3000.

MAUA BANK,
101—103 CALLE CANGALLO

The Offices of this Bank having been removed to the above spacious building, in order to suit the increasing flow of business, the public is informed that the following transactions are carried on in currency and specie in this Bank:—

First—Bills and obligations with good signatures are discounted on conventional terms.

Second—Money is advanced on mercantile and other securities approved of by the Manager.

Third—Accounts current are opened with Merchants or other parties who may prefer depositing endorsed and transferable securities, against which they may draw up to an amount previously convened under conditions established for such class of operations.

Fourth—Money is received in account current, bearing interest from day of deposit, which is accumulated in favor of the parties every three months, the depositors being allowed to retire at any time, by means of cheques, part or the full amount at their wish, save when the quantity exceeds three hundred doubloons or one hundred thousand dollars currency in which case forty-eight hours previous notice is required to begiven to the Treasury of the Bank.

Fifth—Bills or letters of creditare drawn and taken on Montevideo, Rosario, Sta Fé, Salto Oriental, Paysandu, Rio Janeiro, and other places in the Brazils, England and France, as also on other places, of which notice will be given hereafter.

Finally, the Bank undertakes and executes all legitimate transactions within the scope of banking operations.

The establishment is always open from 10 a.m till 3 p.m.

P. P. Maua & Co.
M. A. de FREITAS AMORIM.

PROVINCIAL BANK
OF BUENOS AYRES.

BUSINESS HOURS FROM 10 A.M. TO 4 P.M.

Deposits of not less than $400 m/c. and $f.16 received. These deposits will not be entitled to interest if retired before the expiration of sixty days from the date of such deposit; after sixty days they will be entitled to interest from the date of the deposit. All interests not collected shall at the end of each year be capitalized. All deposits at interest shall be entered in a book which the Bank will deliver to the depositors, in which all payments of interest and capital shall be entered, and all interest shall be payable after the first of the month or on retiring the deposit.

The Bank discounts bills with two signatures having from seven to ninety days to run; it also discounts mercantile bills of from seven days to six months, on the condition that at maturity they are paid in full.

The Bank draws at sight upon the following branches:—

DOLORES,	CHIVILCOY,
SAN NICOLAS,	MERCEDES,
LOBOS.	BARADERO,
SALTO.	AZUL.

The Bank pays commission to Brokers on the first discounting of bills and promissory notes.

LOANS TO THE WORKING CLASSES.

The Bank lends to artizans and operatives sums from THREE to TWENTY THOUSAND DOLLARS on their own signature, taking as security a document with any well-known signature

The objects of the Company are mutual.

Each Shareholder of the two or ten patacon notes has a share in the drawings which take place in June and December, semi-annually. The holder of one hundred patacons in notes is entitled to a Bond with quarterly interest coupons the interest on said Bonds being 10 per cent. per annum.

All funds received on sale of Tickets, Bonds, &c. are invested in mortgages on real estate and chattels, and the vouchers of same lodged in the Provincial Treasury under the special charge of the Government delegate, appointed to inspect the affairs of the Company.

The Popular Argentina gives the following securities:—

1st. Administrative and guarantee capital $f500,000, besides a reserve fund to be formed of $f50,000, afterwards to be increased to $f100,000.

2nd, Invertion of all the capital in documents secured by mortgages on property or loans on stock.

3rd. Deposition of these documents in the office of the Treasury of Buenos Ayres.

4th. Intervention in and fiscalization of all the operations of the Company, effected by a Board of Directors chosen yearly by the subscribers themselves.

Every half year reports are published of the tate of the Company's affairs.

Circulars and pamphlets, with the fullest particulars respecting this company can be had on application at the Banking Office, 213½ Calle Piedad, Buenos Ayres.

GOVERNMENT MORTGAGE BANK

Offices—111 CALLE SAN MARTIN.

This Bank will be open to the Public on all business days from 10 a.m. to 4 p.m.

It advances on real estate to be repaid at long dates.

It pays Mortgage Certificates (Cedulas Hipotecarios) for the amount of the loan it advances, which bear an interest equal to that collected by the Bank.

The value of property offered in mortgage shall not be under two thousand patacons, nor the loan be less than 500 fuertes.

No loan can exceed half the value of the property mortgaged.

The Mortgagor shall bind himself to pay an annual sum so long as the mortgage lasts, said sum to represent the interest on the sum lent the amortization fund and commission to the Bank. This yearly sum shall be paid quarterly or half-yearly.

Series A—Quarterly.

Mortgage for 20 years 117 days, 8 per cent. interest, 2 per cent. amortization, and 1 per cent. commission.

Series B—Quarterly.

Mortgage for 27 years 270 days; 8 per cent. interest, 1 per cent. amortization, and 1 per cent. commission.

Series C—Half-yearly.

Mortgage for 20 years 190 days; 8 per cent. interest, 2 per cent. amortization, and 1 per cent. commission.

Series D—Half-yearly.

Mortgage for 28 years 5 days; 8 per cent interest, 1 per cent. amortization, and 1 per cent commission.

Upon the full payment of the yearly sums stipulated in the Mortgage, both property and Mortgagor shall be freed from all further obligation.

The Mortgagor shall be at liberty to anticipate the payments and to discharge the mortgage, all or in part.

Applications for mortgages must be made in writing, specifying the property offered, accompanied by the title deeds, the receipts of the Contribucion Directa tax, and setting forth that the property is free from all incumbrance, or if not the incumbrance that exists thereon, and which is to be paid off by the mortgage. The Secretary of the bank will supply applicants with the forms necessary as also the tables for amortization.

Quarterly mortgagors shall pay from 8th to 15th of each January, April, July and October, and half yearly mortgagors shall pay between the 8th and 15th of each January and July.

With the amortization fund, mortgage certificates (cedulas) shall be redeemed at par by quarterly and half yearly drawings.

The mortgage Bank pays the interest on the quarterly cedulas or mortgage certificates between the 31st December and 6th January, the 31st March and 6th April, the 30th June and 6th July, the 30th September and 6th October every year, and on the half yearly cedulas from the 31st December to 6th January, and from 30th June to 6th July.

The Mortgage Bank can act between the capitalist and mortgagor, free of charge in the way of realizing the cedulas, and for this purpose will receive deposits without interest, which will receive a preference, and which sums will be deposited in the Provincial Bank.

On and after the 15th February 1872 the Mortgage Bank will be open to the public.

Jose M. La Fuente,
Secretary.

MEDICINES THAT LENGTHEN LIFE The average length of human life would be greatly extended if the present large use of Bristol's Sarsaparilla could be made universal in diseases arising from impure blood and scrofulous humors. Medicines that have the positive property of curing disease and the negative quality of being perfectly harmless, are rare. Bristol's Sarsaparilla is one of them. It would be almost impossible to produce a case of scrofula, or any other ulcerous or eruptive disorder, that could not be controlled by this all-healing vegetable alterative, and equally impossible to name an instance in which it has operated deleteriously on the feeblest of patients.

FRIDAY, MAY 24, 1872.

THE QUEEN'S BIRTHDAY.

To-day Her Gracious Majesty completes her 53rd year, and there is no part of the world where her subjects rejoice more heartily at the auspicious event than here in the River Plate. It is true we have no public celebration, no official display, no noisy fireworks, no demonstrative signs of patriotism and loyalty. But none the less do we cherish the sentiment that England and Englishmen have reason to be proud of the monarch whose reign has seen so many splendid advances in the highway of human progress, under the shadow of that stability, order and impartial justice which make the United Kingdom a model for all nations.

Let argumentators assert if they will that the glory of England is no the decline, we know that never at any previous period were the power, wealth and trade of Great Britain at all comparable to what she can shew at present, and the rising sun of the Queen's birthday is ushered in by the beat of the English drum in every quarter of the earth. The colonies and possessions which we call ours, in Australia, India, Canada, South Africa, and elsewhere, are growing up into new empires of Britain. While the prosperity of the Mother-country is so great that all other nations go hat-in-hand to the capitalists of London to borrow money for their internal necessities and development.

Nor does the wealth of England enervate or corrupt the active spirit of enterprise transmitted in our veins by our forefathers. We have achieved the splendid work of laying a cable from the old to the new world, we have bound together all nations and peoples with iron rails, we are about to lay down a tunnel from England to France, and to make a railway to India which will bring Bombay within a week of London. We are doing nearly all the engineering work of the World, and at the same time we pay so much attention to the arts and abstract sciences that there is not a field of human learning, skill or discovery in which we cannot point to a host of distinguished countrymen.

Nor are we jealous of other nations, but only too anxious to help them forward in the race. We lend them money, engineers and statesmen in their time of industrial development, and if affliction befall them we act the Good Samaritan and shew an example of princely beneficence and unmeasured liberality without staying to ask what the color, politics or religion of the sufferers may be.

The world may say we are proud of our own importance: it is difficult to suppose it could be otherwise. But at any rate we use our greatness for the benefit of our fellows, the advancement of humanity. Take the name of England and Englishmen from the present age: it would be to remove the sun from the firmament. The world could not get on without us, and that is a fact which no people in either hemisphere will deny.

There is only one day in the year when we assume a privilege to boast in this manner, and that is the Queen's birthday. The crown is the centre of our system and as long as it is so the prosperity and stability of England are safe. Long may Her Gracious Majesty rule over the United Kingdom, enthroned in the affections of her subjects.

IMPORTANT INTELLIGENCE.

BOLIVIAN QUESTION SETTLED.

DEPARTURE OF MINISTER FRIAS.

In communicating the following important news to our readers, we accept the entire responsibility of divulging what was yesterday considered a great State secret. Not even the Congressmen knew what was going on, whilst the Argentine Cabinet sat and decided upon a subject of perhaps transcendental importance to the posterity of the River Plate. A war with Bolivia at the moment would, no matter how victorious our arms, ruin the Argentine nation—not so much for its cost, or even the possible loss of life in such a struggle, but from the fact that it would stop the pendulum of industry and enterprise in the Republic.

We have now so many works in progress, that if we stop for a moment widespread ruin must ensue. We must strike when the iron is hot, or forego everything.

President Sarmiento, with a far-seeing eye, reads the ulterior consequences of a strife which might, in a generic sense, be termed fratricidal, and with a penetration of judgment which does him the highest credit, named Dr. Frias as Prime Minister; who is at present in Tucuman; and, instead of bringing him down to the Government House here, has so arranged that he starts off in an entirely different direction, and with the noble object of arranging with the Bolivians on their own territory the trifling and yet ominous matter in debate.

Perhaps one of the most beautiful illustrations of the aid which science lends to politics, was the scene yesterday at the Government House. Cañute himself was outdone, for His Excellency sat back in his arm chair and through the medium of electricity held a conversation with his prime Minister, Dr Frias, in Tucuman, a distance of over one thousand miles. The sight was a grand one, and suggestive of the power of a nation that boasts of such elements. We want no press copy of the telegrams to divine that electrical cabinet meeting, for we know the result. We can imagine the President's first message to the Minister. "Can you go to Salta, to arrange with the Bolivians." To which "the Doctor replies," yes, when you like." Then the President says: "Go before a Tucuman escribano, take the oaths of office, prepare for your journey, this night I wire you your despatches, and start to-morrow."

And in effect this is what has taken place. Yesterday at a cabinet meeting it was resolved that Dr. Frias should be sworn in at the Cabildo of Tucuman, and start next morning for Salta, to settle with the Bolivians all questions of limits, Gran Chaco, Tarija, Vermejo, Villa Occidental, &c. Dr. Frias being a Provinciano, and well acquainted with the history of the present difficulty, is eminently qualified for so important a trust. All yesterday and all last night, we understand, the telegraph clerks were at work transmitting to the plenipotentiary the very fullest instructions.

We believe we can now regard the matter as settled, for unless Bolivia presents some preposterous demands, Dr. Frias is the man to settle the question.

The fact that so grave a question should be all settled by telegram is really one of the events of the age; and if every patriotic Argentine should feel indebted to President Sarmiento for the sound peace policy he stands by and maintains, so also the friends of science cannot forget the obligation which electricity owes to our President for giving it such prominence in the supreme councils of the nation.

IMPORTANT FROM BOLIVIA.

THE CHACO QUESTION.

COL. CHURCH'S RAILROAD.

The latest news from Bolivia is not very assuring. It would seem the sister-republic is determined to claim the Chaco territory north of the Bermejo, and an unpleasant occurrence has happened which is likely to precipitate matters and possibly lead to a rupture.

On March 31st the President of Bolivia, General Agustin Morales, issued the following decree from "the very illustrious and renowned city of La Paz".

"Whereas the Government of Bolivia is bound to pay attention to the vast and fertile regions of Eastern Chaco, with the rivers traversing it which are affluents of the River Paraguay.

"It is hereby decreed as follows:—

"Art. 1st. The Southern part of Bolivia is formed into the new territory of Gran Chaco.

"Art. 2nd. The authorities of Tarija shall report for the fixing of boundaries.

"Art. 3rd. A political and military Governor shall be appointed with a Secretary and an Adjutant.

"Art. 4th. The town of Caiza is to be temporary seat of Government in the Chaco.

"Art. 5th. The supreme Government will attend to the requirements of the territory".

The above decree is counter-signed by the Bolivian Prime-Minister, Casimiro Corral, and the first act of that Government seems to have been to call out the Nat. Guards of Tarija for drill, as if expecting momentous occurrences.

On May 3rd Major Perez Millan, whose command is on the Argentine and Bolivian frontier-line somewhere about Oran or the Bermejo, sent a despatch to Col. Napoleon Uriburu, who forwarded it to Governor Helguera of Tucuman, for transmission to the War Office at Buenos Ayres, to the effect that some scouts from Fort Castigado, having gone three leagues into the Chaco to look after Indians, met a Bolivian officer and 25 men who gave them the following note—

Comandancia of Ingavi,
April 27th 1872.

To the Argentine frontier-commander

Sir,

I learn with regret that in your explorations you have intruded on Bolivian territory, but as such friendly relations exist between our respective Governments I am sure that you have not acted by superior order, but simply through some error of your own. Begging yoog will reflect on the consequences of such a step, and evacuate the Bolivian territory which you now occupy.

I remain
Manuel O. Posse.

To this the reply of Col. Napoleon Uriburu was, that the territory in question did not belong to Bolivia, and that he occupied it by order of the Argentine Government, adding that he could not evacuate it without exposing the lives and properties of the Vermejo settlers to the Chaco Indians. In his note to the War-office Col. Uriburu shews that Fort Castigado, the furthest Argentine post, is 50 leagues South of the Bolivian town of Ingavi and 30 leagues from the nearest Bolivian settlement Tastaga, where they have a frontier force of 200 foot, 35 horse and 10 gunners with a piece of light mountain-artillery. He adds that the Governments of Tucuman and Salta are ready to repel any invasions.

When the War Minister, Colonel Gainza, received this news and consulted with President Sarmiento, on May 11th, a telegram was at once despatched to Governor Helguera to forward same to the Government of Salta with instructions for Napoleon Uriburu as follows—

1st. To acquaint the nearest Bolivian authorities that the reclamations of that Government have been received, and President Sarmiento anxiously awaits an envoy from Bolivia.

2nd. To say that no direct order has been given to push forward fortifications into the Chaco.

3rd. To urge that it would be dangerous for frontier commanders to have the faculty of fixing limits.

4th. To say that the Argentine Government hoped the Bolivian authorities would avoid useless conflicts until the matter could be inquired into.

The despatch also advised the Salta Government, in case the Bolivians kept advancing, to take steps to defend the national honor, but if the Governor thought Col. Uriburu had gone too far he was to be recalled to the old line of possessions, and no National Guards were to be mobilized unless the danger was pressing, and notifying the War-office at once in such case.

The Governor of Salta in a reply dated May 16th to the War-office says that he received the previous day the telegram of the 11th from B. Ayres, and at once sent copies to the Prefect of Tarija, to Col. Uriburu, and to the Bolivian Consul in Salta. He adds that he has just received from Col. Hilario Carrasco, Vice-Governor of the Oran territory, a despatch announcing that Major Perez Millan had made prisoners of a Bolivian detachment of 90 men under a Major and some Captains and Lieutenants, who had ventured within a few leagues of Fort Lavalle.

We can easily imagine what a sensation this will cause in Bolivia when the news becomes known there, but this will hardly be for some months, as the Prefect of Tarija will probably suppose his men were lost in the Chaco and fell victims to hunger or wild beasts.

Meantime the people of Bolivia devote much attention to the new enterprises that have been set on foot since the fall of Melgarejo. The Caracoles mines are turning out of fabulous wealth and the miners are making such fortunes that more that 5,000 claims are now being worked, and the railway to Mejillones is actively pushed forward, to facilitate the transport of metal to the seaboard.

Col Church's steamers are ascending the Amazon and are daily expected to enter the Madeira: the railway of Mamore and Madeira which he is constructing will throw open 3,000 miles of ver navigation in Bolivian territory, (for vessels drawing from 3 to 6 feet of water) in connection with 15,000 miles of navigable waters in the Amazon and its affluents: some of the latter are gigantic rivers, such as the Beni, which has 179 feet depth of water where it joins the Amazon. So immeuso (writes Col. Church to the *Nacion*) is the volume of the Amazon that if the Mississippi were discharged into it there would not be a rise of 6 inches. The only interruption between Bolivia and the Amazon is the Falls of Cacuhenlas, 228½ feet in a distance of 4 miles, over 18 barriers of rocks: here it is that Col. Church is making a railway round the falls. The project of Hopkins's Railway through the Chaco to Bolivia meets also with much favor.

The steam-service on Lake Titicaca increases: on April 9th the Yapura was launched at Puno with great pomp, in presence of the authorities. The railway to this magnificent lake will soon be undertaken.

ARGENTINE TROOP-SHIPS.

(*From the "Nacion".*)

We fully concur with Mr. Senillosa's suggestion to put on Argentine war-steamers to ply between Europe and Buenos Ayres in the double capacity of training-ships and transports for agricultural emigrant families. We should like to see it at once put in force, in some manner like "troop-ships" of the English Government. Six vessels might be equipped in this manner, bringing out 500 passengers each trip, which would give us at least 12,000 industrious settlers yearly, or enough to bring under cultivation 500,000 acres or 75 sq. leagues of our idle territory. In this manner we should, at a trifling cost, meet three great requirement of the country, viz—war-vessels, trained marines, and agricultural colonists.

Each vessel could be provided with handbooks in various languages, to instruct the passengers in the nature and condition of the country. Thus each steamer would bring a little colony in itself, which could be at once, after landing, settled down in a group on the concession marked out for it.

The cost of bringing out 12,000 settlers at £5 per head would be £60,000, or say £10,000 for each of the 6 vessels, making 4 trips in the year; which outlay would be more than covered by the immediate gains. We could sell the farm-lots (at long dates), say of 10 cuadras or 40 acres each at 8$f. per cuadra, or 8 shillings an acre, which would represent a sum of £192,000, besides the enhanced value of the alternate lots (reserved to Government) and worth an equal figure, thus giving a gain of nearly two million hard dollars yearly in return for an outlay of $300,000. This would soon enable us to have the finest navy and greatest number of colonies of any country in South America.

NOTE. We should rather see the *Nacion* put the land at one-eighth of the above figure, say a shilling per acre, or 1 hard dollar per cuadra.

THE PRESERVED MEAT QUESTION.

Whilst we are all groping our way to the solution of the preserved meat question, with M. Gouldstone in the front, the following important paper comes to us from Australia; it shews that the Gouldstones of Melbourne are pushing ahead, and their efforts are crowned with a veritable success. If the charming Lomas de Zamora had but a little of the goaheadism of Victoria, doubtless M. Rossignol's opinion as to Mr. Gouldstone having hit on a fortune would be admitted by all. Good mutton from the Lomas can be sold in London to-day at 7d. per lb.; bear that in mind, Mr. Gouldstone, and make an effort.

The *Melbourne Argus*, of February 29, says:—

The business is in an active position, and the days will soon arrive when a full export trade will be resumed. The Melbourne Company, which at present exports the bulk of the meats preserved in Victoria, is working up to the highest pressure. During the six months ending to-day, no less a quantity has been shipped by the company than 2,100,000lb weight of meat, contained in 480,000 tins, or 32,000 cases. Mutton is still the principal meat operated upon. In the face of London advices stating that a limited demand exists for beef, only small purchases of cattle have been made by preservers. They look forward, however, to a large demand before long, thinking that as the stocks of mutton in the market at the beginning of the year became low, consumers would be induced to try beef. The prices of fat sheep range rather high just now, and are more favourable to the grazier than the preserver. From 8s. 6d. to 13s. 6d. are the rates paid; well-conditioned cattle cost from £7 to £8 10s. But so long as preserved mutton brings from 6d. to 7d. per lb. in London, the current rates paid for sheep fit for curing will not be felt.

There are prospects of a large trade springing up with India and China. It is, however, as yet quite undeveloped. Few vessels sail hence to the India and China ports—at least few that are available to shippers of meat; and the rates charged by the P. and O. Company for carriage by their mail boats are of course too high. Occasionally shipments are made by vessels going to Batavia, to Indian ports, and to Hongkong. No doubt is entertained that a large trade would arise if regular shipments could be made. A sort of prejudice against Australian meats appears to exist in Indian markets, and merchants there would like if they could to keep to English importations; but our preservers do not doubt of their ability to clear prejudices and obstacles away when once they can be sure of carriage for their goods.

We have been shown the following passage in a private letter from an authority in the Peninsular and Oriental service: "The introduction of Australian butter and jams to our ships has been a great success, and I think we shall be able to avail of, to some extent at least, your soups and meat. Not only are all these articles cheaper than anything we can get from home, but their quality is very much superior."

EDITOR'S TABLE.

GOD SAVE THE QUEEN. To-day is the 53d anniversary of the birth of the best and most beloved Monarch that ever sat on the English throne. The Sun, in its course to-day, looks on hundreds of millions of Her Majesty's subjects in every quarter of the globe rejoicing and praying for her happiness and welfare, while a file fire of thundering British cannon keeps pace with the orb of Day, from East to West. The English residents of the Plate yield to none in loyalty and devotion to Her Majesty's person and Family; and from no quarter of her empire ascend to-day more fervent prayers for her and the stability of her throne and dynasty than from her subjects in the River Plate. She lives in all our hearts as a model Queen and woman.

The news from Bolivia yesterday was important, and shows the intricacies of the question now on the tapis. We publish it in another column.

The former 'maitre d'hotel' of the famous Hotel in the Sierras of Cordova has come to town and started a restaurant at No. 33 Calle Reconquista. Anyone who has had the pleasure of being 'restored' by him in Cordoba will certainly pay him a visit at Reconquista.

The Bill before Congress for altering the representation of the people is Congress to accord with the population of the Provinces will leave them the following number of Deputies respectively:—Buenos Ayres, 25; Santa Fe, 4; Entre Rios, 7; Corrientes, 6; Cordoba, 11; San Luis, 3; Santiago, 7; Mendoza, Rioja and Jujuy, 2 each; San Juan, 3; Salta, 5; Tucuman, 5; and Catamarca, 4. Mr. Lafuente estimates that when this country numbers the same population as the U. S. we shall require *two thousand* Deputies. Such a contingency is simply awful to contemplate.

"Le Cooter est mort!" It must be admitted that she died game, and held her own far better against outraged Public Opinion than ever she did against time and tide, which she had a habit of waiting for. However, 'de mortuis,' etc. Our go-a-head government has at last consented to 'stump up' $f150 a trip towards the expense of a steamer to carry the mails between this place and the Mount, till the port be opened. The Montevidean Government will subscribe the balance. The shabby genteel conduct of our government in this matter does not contrast well with that of President Gomensoro's; however, this sentimental part of the 'cooter' grievance we leave to those whom it may concern.

The Ptolemy's mails bring the same news as we published 10 days ago, and which came by the last steamer for Chile.

Those who were disappointed on Tuesday can see Lucia go mad, and Edgardo commit 'felo de se,' this evening at the Colon Theatre. A crush may be looked for confidently, as attending the theatres is an integral part of the May festivities.

We have already recommended Ferruginous Gin. No idea of the effects of the liquor can be formed without trying it. We felt like a crowbar after the first thimbleful, so strengthening is the effect of the iron contained in it. We are informed that the Ferruginous is now being analysed by Professor Kyle, whose report will soon appear. The Ferruginous is now on sale at the well-known establishments of Jones, Cranwell and Murray, Torres and Barton, Eastman, and Simmermacher.

Our Irish readers will be sorry to hear that Derry Castle, the magnificent residence of Mr. William Spaight, situated upon the shores of Lough Derg, near Killaloe, was burned to the ground last month. Two persons were burned to death in the fire. It is believed that the fire was the work of an incendiary.

Rocket firing began in Plaza Victoria yesterday at an early hour. The usual congratulatory ceremonies were gone through by the Governor and all concerned, and at night dinners, tertulias and serenades were the order in official quarters. The principal business of to-day will be rocket and squib firing, and to-morrow "Oid Mortales" in the Plaza, by the Orphans, at daybreak. Te Deum at the Cathedral, lunch at the Mansion House, balloons and acrobats in the Plaza Victoria, and (Government permitting) soaped pig in the Plaza Once, the whole to conclude, in the language of Vauxhall, with a magnificent display of fireworks—and bed. Numbers of families are coming in from the country to enjoy the day.

Two horrible catastrophes were reported yesterday. At the Plaza 25 de Mayo a beam fell on a boy and killed him on the spot; and a young man named Pelly fell dead in Mr. Tomkinson's office while engaged at work. It appears the unfortunate fellow, who had disease of the heart, was bottling wine; a bottle burst without injuring him, but he fell as if shot. Messrs. Cranwell and Murray were sent for; the firm attended and pronounced life extinct, the Police-doctor subsequently coinciding.

At San Nicolas the townspeople are also getting up a pig race for to-morrow. 'Les grandes idees se rencontrent' and it is really remarkable how Piggy seems to be in the ascendant just now.

Our English colleague *The Examiner* has been written to on the subject of Smoking in Church! Goodness gracious!—what is the world coming to! Smoking in bed, in the parlour, or at your wife's funeral, is a mere venial sin compared to this new and reprehensible custom, for which, it seems, we are indebted to the Dutch. The following is the communication referred to: "Sir,—Having seen a statement in your edition of April 16th, that some Dutch deny the facts related by your correspondent, I venture to trespass on your space. Two years ago I was present at the Sunday ser-

vice in Haarlem Cathedral. Almost all the men smoked during the sermon, and many during the entire service. During the prayers, hymns, and reading the Bible all the men were without their hats, but put them on during the sermon, raising them, however, when the preacher quoted Scripture.—I am, sir, yours obediently, E. I."

San Nicolas is going ahead like steam; the average daily number of arrests by the police there is now 16, an unmistakable sign of the times.

Another sign of the times is that the new Minister of the Interior, Dr. Uladislao Frias, accepted his nomination by telegram. The brevity of H.E.'s answer gives good promise for the future. Most Argentine public men so honoured would have wired a couple of columns of congratulatory matter, winding up with a hope that every one "might live for ever," etc. Not so the new Home Minister. He was at dinner when the despatch arrived, and after reading it helped himself to another potatoe and sent the following answer to the Telegraph-office:—"Todo cuadrado; busqueme una casa." "All square; get me a house." "Brevity is the sole of wit" and business, and we hope Dr. Frias will lead the fashion in shortening Ministerial decrees, memorias, etc., which so often give unfortunate editors lumbago through poring over them.

There is a tax-gatherer in town who has just strangely borne out our assertion that there is luck about Standard Court. Last week we paid him a trifling Contribucion Directa to the Exchequer. At our door he bought a lottery ticket with some of the money, and two days afterwards he was possessor of the first prize in the Uruguay Lottery.

The Severn, which arrived in port yesterday, has already been christened as many names as the 'Cooter'—Severe, Souverain, Souvenir, and half a dozen other names were imposed on this fine vessel yesterday by our Argentine colleagues; neither ship or cargo, however, are anything the worse.

The following proclamation is worthy of the Thirty Years' War. The Madrid correspondent of the *Independence Belge* states that General Buceta, in assuming command of the troops at Malaga, addressed them in the following most remarkable terms: "Soldiers, I am informed that the inhabitants of Malaga may, perhaps, attempt an insurrectional rising at the elections; in this case, do not suppose that I shall send you into the streets to obtain possession of the barricades. No; we shall march out of the city, and from thence the artillery will destroy it. We shall then return and march through its ruins, which will be strewn with corpses. Let no quarter be given: I won't have any prisoners made, for they might manage to escape. I wish that you may be able to say, 'General, I have killed so many men without making a single prisoner.' My opinion is, that to hold in check one-half of the population, it is necessary to kill the other half. I speak to you in the name of the national sovereign."

As we observe that it is now the practise with some papers in England to offer prizes for essays on subjects of general interest, and as the British Library is now extinct we think it may be useful to the public and entertaining to the young Englishmen of B. Ayres to try a similar expedient here. What the Athletic Sports are for the body theme-writing is to the mind, and it may serve as a pleasant and improving occupation to our young countrymen in Buenos Ayres to turn their intellect to the study of matters of public utility, in the way we suggest. We consider that we are fully compensated for the value of the prize by the right of publishing the essay in our columns. As loyal subjects of Queen Victoria we commence this programme from Her Majesty's birthday.

There was a change in the Moon last night, and many predicted a change in the weather this morning, and a change in all our tunes to-morrow should Rain decide to take part in the National rejoicing. If all the same to the Rain, we suggest to it to be patriotic, and postpone its appearance till the next holiday—the 30th—Corpus Christi.

Tim Aparico has sent his compliments to President Sarmiento and Minister Tejedor, for their assistance in bringing about peace. Well he may. Tim has been fighting for two years 'for an idea' that has produced him a house and estancia, together with a round sum in hand. What patriot would not fight for an idea like this?

A new colony has been started in Santa Fe by Sr. Avila. It is called San Isidro, and is situated three leagues from Rosario, and one from San Lorenzo, and offers the same conditions as the settlement lately founded by our countryman, Sr. Cullen.

The Rosario papers to hand yesterday contain nothing of the slightest importance from that place. Everything dull; even bull-fighting languishes.

The *Republica* proposes to do away with 'dias feriados,' asserting that out of the 366 days in the year we lose 102, Sundays included. We partly agree with our colleague. Some of the political anniversaries seized on avidly at the Government Houses for idling purposes might be abolished, but the others are more difficult to deal with, and it is a case where too much of a good thing can be tolerated. In abolishing religious holidays there is but too much chance of abolishing also the religious feelings which they are intended to foster. Better let well enough alone. Argentines delight in holidays, and foreigners, as a rule, do not object to them.

We understand that the thirty additional serenos slept well last night at their posts. Five or six years ago this redoubtable force was larger than at present, though its services are now more required.

All the aldermen and town-councillors in the new Municipality seem determined to retire into private life. The last resignation sent in is that of Sr. Pinto, representing the Piedad ward.

There is at last some chance of this port being opened, the Health Council at Montevideo having notified the Government there that the yellow fever has quite disappeared.

The editor of the *Debates*, published in San Luis, has been 'warned' for a political article of an unusually stiff description. Our brother of the pen is now saved the trouble of writing any leaders, and he leaves three columns blank where the leaders ought to be, declaring liberty of the press extinct. Some of his subscribers think they lose nothing by the change, which is copied from the French.

We find in a contemporary a very curious and incomprehensible announcement to the effect that the Superior Tribunal has liberated in commemoration of Pentecost a dozen of rascals confined in the city prisons. Amongst them are four men accused of murder and wounding. If this be true, the Superior Tribunal sadly wants looking after by the public. We cannot see that a religious anniversary is at all well commemorated by letting loose such miscreants on society, leaving out of case the strained connection between prisoners and piety which such commemoration establishes.

The glass of the Cabildo clock was smashed on Wednesday night by a 'gamin' who took a magnificent shot at it from behind the pillar of Liberty. The sentry on guard did not know what to make of the occurrence, and the urchin vanished in a twinkling.

THE ALABAMA QUESTION.

IMPORTANT DOCUMENT.

The following is the closing paragraph of the British case laid before the Geneva arbitrators.

In conclusion; the case says:—

For the first time in history, as the British Government believes, it has been seriously insisted that every act or omission, however doubtful or insignificant, on the part of a neutral Government or its officers which could be construed by a belligerent into a deviation from the line traced for neutrals by international law and practice, may be made the foundation of pecuniary demands upon the neutral power such as are now urged against Great Britain. If this be so, it becomes a matter of the highest moment that the rules binding on neutrals should be simple and few. But what, according to the case of the United States, must be the ordinary situation of a neutral in a maritime war? It must be a situation of perpetual and unremitting anxiety, surrounded by dangers, harassed by a crowd of new obligations unknown in peace which nothing short of sleepless vigilance will satisfy, whilst any lapse in the performance of them, on the part even of a subordinate officer, is to be visited with heavy national penalties. The transactions of private commerce must be made the object of minute inquiries and incessant supervision. Private persons suspected of being agents of either belligerent must be tracked when within the neutral country by spies and informers. Trade with the belligerent nations must be fettered by restraints and prohibitions. The hospitalities ordinarily accorded to belligerent ships in ports of the neutral must be guarded with precautions, for the strict enforcement of which no honesty or zeal on the part of the local authorities can afford an adequate guarantee. Laws and regulations enacted by the neutral nation with a view to its own protection, from being a means of security, become an additional source of danger when they are liable to be construed as acts by which the neutral establishes as against himself, by admission or otherwise, a new class of international obligations. It is evident that if these principles were to be generally adopted, the only prudent course for neutral powers would be to enact no regulations, repeal all laws which could be interpreted as admitting liability against themselves, exclude all belligerent vessels of war from their ports, and prohibit all traffic with belligerent nations. But even this would not be enough, since it is difficult, perhaps impossible, for maritime states, by any legislative or administrative precautions, to isolate themselves and their subjects completely from all contact with a maritime war. States, especially the less powerful, would be tempted to abandon a position so precarious and menaced by such heavy penalties, to choose in preference the certain evils of war itself, and to seek protection in an alliance with one belligerent or the other. Finally, her Britannic Majesty's Government desires to express its earnest hope, in which it is assured that the Government of the United States will cordially share, that the frank and open statement of facts as they actually occurred, may effectually remove every misunderstanding between nations allied by innumerable ties to one another.

THE WORK OF THREE YEARS.

Three years ago yesterday General Grant took an oath before the country to perform the duties of the office of President to the best of his ability. He succeeded an unclean and degraded Administration. He found the public service rank with festering corruption. He saw the taxes plundered, the revenues squandered, the severe strain of the country under prodigious taxation removing no part of the burden which oppressed it. He understood his oath as commanding him to change all this.

Three years have passed, and Three Hundred Millions of the debt have been wiped out. The exact figures of reduction on the first of March, as compared with the same date in 1869, were $ 299,649,762 03. Nearly a seventh part of the entire present principal extinguished in this brief period! This reduction in the principal produces a reduction in the annual interest of Eighteen Millions. And it is still going forward with unimpeded pace. The reduction for the past month was over Twelve Millions. Is not this a faithful fulfillment of the President's oath?

Nor is this all of it. The taxes have at the same time been reduced in a corresponding ratio. Eighty millions have been struck off since the Administration began, and a still larger sum just before it entered upon its term. The country has paid less and has received more for it. It has gained on both sides of the account. Estimating what has accrued from the reduction of the debt, on the one hand, and from the reduction of the taxes, on the other, it may credit the present Administration with not less than Four Hundred Millions saved.

This is the profit of honest government. It springs from faithful application of the revenues, from retrenchment in expenditures, from frugal and provident rule. If the advance of the public credit, the increased purchasing power of money, the enhanced values and greater security were estimated, the gain would be immeasurably greater. In the face of such exhibits, the petty charges of partisan malevolence make no serious impression. These facts and figures answer a legion of calumnies. When the country feels such a strong sense of relief and security, it is idle to attempt to mislead it with empty innuendoes.

When Gen. Grant became President a $100 United States bond was worth $82.72 in gold; it is now worth $101 in gold.—*New York Evening Journal.*

SHEEP HUSBANDRY.

BY GEORGE GEDDES.

Mutton sheep.

England has made mutton-producing sheep the 'pivot upon which her agriculture revolves and the means of making her fields more productive in wheat than even the prairies of the West. The possession by England of the long wooled races of sheep was the foundation of her manufacturing supremacy; the worsted manufacture supplied by this wool, far surpassing that of clothing-wool, and having opened the way for the manufacture of cotton. More than half the wool of England, whose annual product is about 250,000,000 pounds, is used for combing purposes, no wool of the Merino race being produced there. • • England has one sheep to one and three-quarters of an acre of land, while Ohio and Vermont (in 1863) had one to four and a half acres, and New York one to six and a half acres." England has pushed the rearing of sheep that produce the most mutton on a given space of land and in the shortest time, combined with a valuable fleece, to the point that their skilled agricultural processes have determined as the maximum ability of the soil and climate of that country. The sheep is at once the manufacturer of the manure that produces the grain and sustains the tertility of a soil that has been cropped for thousands of years, and at the same time supplies the looms with the material to sustain that colossal system of manufacturing that has made England the commercial and financial center of the world.

I find in an old work on agriculture 21 different breeds or families of sheep described as existing in England at the beginning of this century. Nine of these families are classed as 'long wools,' the other 12 as short or fine. The average weight of the fleeces of each of these families is given, and their general average is 4¼ pounds This is the weight of the fleeces of wethers fatted and at their maturity—their average weight of carcass being 70 pounds. Since that time very great improvements have been made in the sheep of England, perhaps quite as decided as in the fine-wooled sheep of the United States. For my purposes it is not necessary that I should give any account of English breeds beyond those that, I suppose can be profitably introduced into this country,

THE LEICESTER

"is perhaps the most widely extended and numerous breed of sheep in England; they are described by Professor Wilson as follows: "The sheep are without horns, with white faces and legs; the head small and clean; the eye bright; the neck and shoulders square and deep; the back straight, with deep carcass; hind quarters tapering toward the tail and somewhat deficient when compared with Cotswold sheep; legs clean, with fine bone. The flesh is juicy but of moderate quality, and is remarkable for the proportion of outside fat it carries. They are not considered so hardy as the other large breeds, and require shelter and good keep. The ewes are neither very prolific nor good mothers, and the young lambs require great attention. Early maturity and aptitude for fattening are the the principal characteristics of the breed; a large proportion of the wethers finding their way to market at 12 or 15 months old, and weighing from 80 to 100 pounds each; at two years old they average 120 to 150 pounds each. The wool is a valuable part of the productions of the flock, the fleeces averaging seven pounds each."

It was in the improvement and perfecting of this breed of sheep that Mr. Bakewell of Dishley, in Leicestershire, so much distinguished himself. He not only selected his breeders from Leicester flocks, but "their defects he cured by judicious crossing with other breeds • • "The occasional introduction of a little Cotswold blood in a Leicester flock has the effect of improving both the constitution of the animal and also the hindquarters, in which the Leicester is somewhat defective. [Practical Shepherd.]

The flesh of this famous breed of sheep is said to be very much liked by the laboring population of England. The great thickness of fat on the outside the ribs, is not by them objected to, as it furnishes the material for flavoring much vegetable food cooked in combination with it, and thus aids in the economy of living. This excessive fat on the ribs, which in a sample shown in 1840, at a market in Albany, N.Y., equalled 5½ inches in thickness, is not generally so desirable to persons who are able to procure more delicate food. The early maturity of which these animals are capable, the good return that they give to the careful and skilled feeder for all that is given them, the peculiar bright lustrous quality of their long wool, and the fact that their mutton is popular among the great mass of people in England, makes this a favorite breed among the farmers there.

Many importations have been made into this country, and from those that I have seen, I think that some of the best have found their way here. The recent importations, I regard as better than required to meet the description given by Prof. Wilson. Gen. Washington is said to have been the first importer of this breed of sheep, and during the war of 1812, "some choice Leicesters, on their way to Canada were captured by one of our privateers, and sold at auction in New York, and thus became scattered throughout the country." (Randall). However good those early importations may have been, they came too soon for our manufacturing interests to demand the fleeces they gave; and I think that this sufficiently accounts for the fact that until recently, this breed has not taken a strong hold with our American farmers.—*New York Tribune.*

ON 'CHANGE.

May 23, 1872.

Ounces	400
Sovs	122½
Pats	25
National Bonds	74

A new buyer in the market, combined with the news of peace with Bolivia, gave the funds another upward turn to day. The king sold every bond he held, yet the market rose. There was, of course, great speculation as to the real parties who were buying. It was very generally said, one of our private bankers; but those who know that banker pay no attention to any such rumor. Still, it was evident from the unusually firm tone that some new parties had entered, and the probabilities are that they will get all the bonds they can carry. One or two of the best informed knew the decision of the Government relative to the despatching of the new Minister of the Interior to Salta to settle the Bolivian question. The matter was kept secret, and most people attach so much importance to this excellent step of President Sarmiento that they believe the Bolivian question now as good as settled.

The sales were—

For cash	23,000	at 74
May 31	100,000	74
do.	20,000	74¼
June 30	50,000	74½

At after hours buyers at all these rates, but few sellers.

Cedulas showed very firm to-day, notwithstanding 49,200 pats. were sold. The rate held firm at 91½, and looks upwards.

The non arrival of the French packet to-day caused immense disappointment and people now express fears that like the Amazone she has broken down outside Bahia.

The telegram from Montevideo gave paper 3½, home debt 55, fomento territorial 9; nothing whatever about fover.

Exchange rules the same as yesterday and brokers complain very little doing; the rates are on England 49-49¼; on Antwerp 5.20-5.22; on France 5.18-5.19. Few takers on either place.

The machinery for a second animal guano factory at Fray Bentos is now being shipped in England. The first factory has given splendid results. Several cargoes have been sold in England at £9 to £11. 6 per ton. Formerly all this stuff was so much saladero waste, but the genius of Giebert has made it a marketable article.

It is said that $30 m|c was offered to-day for a lot of 10,000 sheep at Cañuelas al corte and declined, 35 being the selling price.

The total outlay of the Municipality on the May fetes is $120,000 m|c.

$75,000 m|c was offered to-day for half-a-square of land near Temperley Station and declined; this land cost last year $30,000 m|c., and for half a square in the same locality $80,000 has been offered, but $100,00 m|c. is the lowest price; this shows the high value of lands in that neighbourhood.

Sheepskins are baled just as fast as sold. No stock.

A native barraquero holds nearly all the stock of dry hides in this market—say 20,000 to 30,000 hides.

To day a fine piece of ground in the South Market, and known as the Plazoleta de Martinez, was sold to Messrs. Heinrichs and Bode at reserved price. The site is a splendid one, 48 varas front by 40 deep.

Money ruled to-day at from 6 to 6½ per cent. per annum for best payer.

Bullrich's auction at Bachelor's Hall, Caballito, proved a slow business. Things sold cheap; small attendance. Bullrich forgot to advertize the sale, and few knew anything about it. The sala furniture sold for a mere song.

The Pacific steamer Lusitania, with dates from Lisbon to the 4th, will be due to-morrow. The following is the May list of steamers of this line leaving Europe for the Pacific—

	Commander.	Date of Sailing.
Lusitania	M. D. Hammill	April 29
Ilo	——	May 7
Garonne	S. S. Holloway	May 13
Truxillo	——	May 21
Araucania	W. H. Bax	May 29

Calling at Bordeaux and Lisbon to land and embark mails and passengers.

The last mails from Europe bring the following extraordinary account of a panic on the Vienna Stock Exchange—

"The day before yesterday a regular panic broke out on the Stock Exchange here, owing to a report that the Foreign Office had received very alarming news from St. Petersburg about the attitude of Russia. Next day it turned out that the whole story was a 'canard. The principal papers contradicted it on the best authority, adding that neither the Government nor the Russian Ambassador at Vienna had received any communication which could give ground for fearing a disturbance of the existing relations between the two countries, and that M. de Novikoff, like the other Ambassadors, would shortly go to Pesth on the invitation of Count Andrassy, to take part in the Court festivities there. The report, which was evidently circulated with the object of producing a fall on the Exchange, seemed to gain a certain consistency from the fact that the *Evening Gazette* of St. Petersburg had just published three articles violently attacking Austria: but we have since received a fourth article in which it completely changes its tone, and enthusiastically praises the 'wise policy' to which the 'magnificent development' of Austria is due. This, which is evidently the result of a hint from the Russian Government, truly characterizes the nature of the present relations between the two Cabinets.

"Notwithstanding the panic of Wednesday, business men have already recovered sufficient confidence to start three new colossal undertakings, with a capital of 60,000,000 florins, and the alarming reports about Roumania and Russia are now estimated at their true value."

The following comments on the last wool auction in London are important—

"The opening of this series was looked forward to with considerable interest, the very high prices of the previous sales having engendered doubts as to the stability of the market on so exceptional a level. The result is very satisfactory and promising as regards the future. For the best Australian wool, 2s. 9d. upwards, the same is paid as in the highest time in February. The medium and good qualities, between 2s. 2d. to 2s. 6d., are just a shade lower than at the close of the last series. The difference is rarely more than ½d., and not unfrequently there is no difference at all. Inferior wools, both washed and greasy, have fallen ½d., and the same may be said of lambs, pieces, and locks. Cape wool is hardly lower than in February. Bearing in mind the high level on which prices stand, and considering that the mere fact of their stability being doubted would necessarily produce some depression, the above result cannot but be considered as evidencing a very strong position of the article. Hitherto the foreign trade has exhibited the greatest reserve, and with the home buyers too, caution has been the prevailing policy. Yet with all this reserve, the position of the bulk of good wools remains entirely unshaken, while on the inferior sorts no greater impression is produced than is involved in a turn of prices in the buyer's favor. As the series goes on, the reserve will probably be abandoned, and the present prices supported with spirit and confidence. There can be little doubt about the healthy condition of the market. The consumption may be in some branches not quite so active as it was a few months ago, but on the whole it is still very great, while the supplies keep within decidedly moderate limits. Last year we had an old stock of about 50,000 bales, and a full supply from the colonies; this year there were no stocks. The imports from Australia are represented as falling short of the supply of 1871 by something like 10,000 to 20,000 bales, and about 30,000 bales have already been taken direct to America. In 1871 the total catalogued in London was 745,000 bales; it is by no means improbable that this year it will be about 100,000 less. As at present arranged, the series will last till 14th May."

Respecting the actual state of the London money market we have the following per Severn—

"Money has again been abundant, and the tendency of the rates has been towards increased ease. There being a rather larger supply of capital afloat, good short bills have been taken in Lombard-street at 3½ to ¾, six months' trade bills being quoted at 4¾ to ¾ per cent. £50,000 in gold was sent into the Bank to day, while the Deutschland has arrived from New York with £49,000. Prices have fluctuated variously, but the tone on the whole has been better than yesterday, and some of the leading railway stocks show a fair improvement. Operations at the present moment are attended which much indecision, owing to the uncertainty attending the case of the money market and to the awkward position of political relations between France and Germany; this, however, should not have any important bearing upon the value of English railway stocks so far as 'bona fide' holders are concerned. It is probable that the greatly enhanced cost of coal, iron, and railway material will much diminish the profit accruing from the increase in the traffic returns, a fact which has been much overlooked by speculators.

"Consols were without alteration to day, the closing price being 92⅜ to ½ for money, and 92¾ to ⅞ for account.

Mr. Oldendorff, of the National Agricultural Department, is now translating into Spanish a paper containing instructions for the new wool washing machines patented by Mr. McNaghten; also a letter from Mr Webster on the chemical process, &c In a few days a joint stock company will be formed in this market to work this patent. The business is in excellent hands, and promises success.

The Entre Riano Government is giving very good signs of a steady and sound political progress, the sum of 340,000 pats. has been just voted to be employed in the creation of schools and hospitals in that province.

A meeting of the creditors of D. Vicente Letamendi is called for the 27th inst.

The heirs of the late Jacob Parker, deceased, are summoned to present claims before 13th June. Also those of Cesar Corti, deceased, before 25th May. Also those of the late James Palmer, deceased, before 27th inst.

A judicial sale of property having been announced in the papers of this city, to take place at Quilmes on 22nd inst., several gentlemen left town on Tuesday at much trouble and expense to attend same. Arrived at Quilmes they found that neither the Judge nor Escribano knew anything of the business, although on the very wall of the Juzgado the notice calling the sale was posted up and shewn to the authorities. This gave rise to recriminations and complaint, and one broker threatens to take an action for damages against the Judge. The matter certainly calls for an explanation, otherwise no reliance whatever can be placed on those legal notices published in the papers.

We have received from Cordova a long letter respecting the marble quarry railway, which we decline publishing until we hear further on the matter.

A petition numerously signed by the merchants of Montevideo has been laid before the Argentine Consul at Montevideo, praying for the opening of the ports of this Republic. The Consul forwarded the petition, the Government sent it to the board of health, whose unalterable fiat was that until yellow fever has completely disappeared from Montevideo it would be unsafe to open the ports.

The Argentine Government at the solicitation of the Montevidean Government has published a decree allowing 150 pats. per round trip for whatever steamer carries the mails between the two ports, the sum is so small that unless the Montevidean Government doubles the subsidy, the Cooter will still remain the mail boat.

The owners of the camp grasorias are gradually getting, their establishments into working order according to the new Higienic rules, the following have made the necessary change, and have now full permission to work,

Chascomus Sr. Arias.
Altamirano Sr. Guerin.
San Vicente Sr. Esteves.
Lomas de Zamora Sr. Larios.
Moron Sa. Paez.
Cañuelas Sr. Uribarren.

It was rumoured that to-day the Nat, Government would promulgate the law authorizing the purchase of iron-clads, next week we suppose the iron-clad committee will leave for Europe.

The site at the corner of Calles Charcas and Esmeralda was sold at public auction yesterday, by Mr. Cerro, for the round sum of $672,000 m|c. Messrs. Casares and Urioste purchasers.

To-day the Nacional Tramway Co. opened its line, this company has had since its formation to struggle against many difficulties, but it is to be hoped now that it has overcome them, and the tradic on the line will yield a fair dividend to the English shareholders.

In the South market this morning a large lot of sheepskins some 800 attracted much notice. A very fine lot of wool, the second lot from Tapalquen belonging to Salaberry was sold to-day at the same price as the first, 115 per ar.

To-day the Government approved of the statutes of the Joint Stock Brick Company at San Isidro. The orders for the bricks from this factory are so large that it is evident soon we shall have many new houses in this city with the English fronts. All the shares of the company have been placed; the management of the concern is in the hands of Capt. Ramsay, who has great experience, and the prospects of the new company could not be better.

Chevalier Peel, who is so well-known in the Plate, has been promoted from the rank of commander to the important post of local manager of the same steam line on shore at Liverpool.

Captain Hairby takes Chevalier Peel's post as Captain of the Olbers.

At all the Provincial Public Offices to-day was observed as a strict civic holiday, to commemorate the swearing of the constitution, but in mercantile circles business was attended to as usual and the brokers as busy as ever.

Some 600 cases with materials &c. for the cleansing of the Riachuelo, to the value of £3,000 sterling, are now being despatched duty free at the Custom House; meanwhile the mechanics engaged in England to put up the machinery are for the last month down in Montevideo, and maintained by the Wanklyn Bank down there.

The official announcement by the Montevidean Board of Health of the cessation of the fever is expected up by next mail, on receipt of which Pres. Sarmiento throws open the port with a week's quarantine.

A paragraph in the *Prensa* announcing the mutiny of a regiment of the Line on the Santa Fe frontier was much spoken of amongst the brokers. Telegrams were sent to Rosario to find out about the matter, which caused an uneasy feeling, but nothing further transpired.

Letters from the Uruguay state that the pass in the river at Corralito is now completely blocked up a small steamer and a large schooner lying right across the river. These wrecks have been now so long in the channel that it is thought the owners have abandoned the idea of removing them. Application is about to be made to the Government on the subject.

The fifth Section of the Port Clearance was inspected yesterday, and in the language of Minister Frias's telegram it was found Todo Cuadrado (all square).

Yesterday the Government decree ordering the immediate construction of a Lazzaretto in Martin Garcia was published. Mr. Pompey Monetta has charge of the affair.

In the North Plaza nothing done, few arrivals.

South plaza arrivals to-day.
13 carts at Station.
25 do Plaza.
400 doz matadero shoopskins at $255 m/c.
No sales of any account in wool, and none sent to deposit.
The general stock of all wools is as follows:—

South Plaza	50,000 ar.
North do	25,000 ar.
Barracas and River wools	20,000 ar.
	95,000 ar.

SAVINGS BANK

BANK MAUA AND CO.

101--Calle Cangallo--103

BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the two great emporiums of the River Plate, Montevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Mauá & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depository for their savings.

The sums deposited in that very important institution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in immoral gambling, in lotteries, and other frivolities.

The Bank of Mauá & Co. of this city, following a noble example of their firm in Montevideo, w offer the same facilities in this city, and has opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.

The Bank will deliver to each depositor a pass book, in which will be entered the amount deposited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interes will be calculated up to date.

The Bank of Mauá & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Mauá & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1867.

P. P. MAUA & Co.,

M. A. DE FREITAS AMORIM

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.

Second—The interest allowed is six per cent. (6 p. 3) per annum, which is liquidated every six months.

Third—The depositors can at any time retire the whole or part of the money deposited.

Fourth—Once the money deposited exceeds twenty-five thousand dollars currency, or one thousand dollars silver, the depositor, if he wish can open an account current, according to the rules established by the Bank.

Fifth—In case the depositor loses his pass book it can be replaced by another on paying twelve dollars currency, and advertising the loss in the public newspapers.

P. P. Mauá & Co.

M. A. DE FREITAS AMORIM

The Steam Engine Trials

OF THE

Royal Agricultural Society

OF ENGLAND.

OXFORD, 1870.

The FIRST PRIZES at this Show were again Awarded to Clayton and Shuttleworth, viz.:

First Prize for Horizontal Fixed Engine of 10 H.P.; First Prize for Steam Engine, with Boiler combined.

At the previous trials of Steam engines, at Bury, 1867, Clayton and Shuttleworth took all the First Prizes for Engines, also a Prize of £15 for Thrashing Machines, and the Society's Silver Medal.

Clayton and Shuttleworth have received

First Prizes at all Trials of the Agricultural Society of England, at which they have competed since 1849.

N.B.—All the Principal Makers of Portable Engines, &c., compete for this Society's Prizes, being the only trials in Great Britain conducted by competent and impartial Engineers; and where the capability and value of each Engine is thoroughly tested by practical experiments. C. and S., therefore, do not compete at any other Shows.

PORTABLE ENGINES, from 4 to 25-Horse Power.
THRASHING MACHINES,
Single, Double and Treble Blast, with Patent Rolled Steam Beater Plates, and all other recent improvements.
Grinding Mills, Saw Benches, Straw Elevators, &c.

MARAVILLA COCOA

OPINIONS OF THE PRESS.

"Those who have not yet tried Maravilla will do well to do so."—*Morning Post.*

"It may justly be called the Perfection of Prepared Cocoa."—*British Medical Journal.*

MARAVILLA COCOA.

The *Globe* says—"Taylor Brothers, 'Maravilla Cocoa' has achived a thorough success, and supercedes every other Cocoa in the market Entire solubility, a delicate aroma, and a rare concentration of the purest elements of nutrition distinguish the Maravilla Cocoa above all others. For Invalids and Dyspeptics, we . . not recommend a more agreeable or valuable beverage."

HOMŒOPATHIC COCOA

This original preparation has attained a world-wide reputation, and is manufactured by Taylor Brothers, under the ablest Homœopathic advices, aided by the skill and experience of the inventors, and will be found to combine, in an eminent degree, the purity, fine aroma, and nutritious property of the Fresh Nut.

SOLUBLE CHOCOLATE.

MADE IN ONE MINUTE WITHOUT BOILING.

The above Articles are prepared exclusively by Taylor Brothers, the largest manufacturers in Europe, and sold in tin-lined packets only, by Storekeepers and others all over the world—Steam Mills, Brick-lane, London. Export Chicory Mills, Bruges, Belgium. cj—26p m15a

NOTICE.

MORSON'S EFFECTUAL REMEDIES

Are sold by Chemists and Druggists throughout the World.

PEPSINE—The popular and professional medicine for indigestion in Morson's Pepsine, the active principle of the gastric juice. In Powder, Lozenges, Globules, and as Wine.

CHLORODYNE has now obtained such universal celebrity it can scarcely be considered a speciality, its composition being known to most European practitioners. The combination of Chloroform quickly relieves the pain and spasms of Cholera, Diarrhœa, Dysentery, and, in fact, all acute and nervous pains, and Chronic Coughs; frequently small doses will produce this beneficial result. Many of the Chlorodynes of commerce are not of uniform strength, this has induced Morson and Son to compound their preparation. Sole in ½-oz., 1, and 2-oz bottles.

GELATINE—The purest preparation of this nutritious agent extant is Morson's.

PEPTIC FOOD for Invalids and Infants digestible, nutritious, and palatable. Sold in ½-lb and 1-lb tins.

All the above are carefully packed and shipped to orders, which must be made payable in England.

Sole Manufacturers:
T. MORSON and SON,
31, 33, and 124 Southampton-row, Russell-square, London.

Works—Hornsey and Homerton.

PURE CHEMICALS and NEW MEDICINES Selected, and Shipping Orders executed with care and despatch.

DR. J. COLLIS BROWNE'S

(Ex Army Med. Staff)

CHLORODYNE

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION.—Vice-Chancellor Sir W. P. Wood stated that Dr. COLLIS BROWNE was undoubtedly the Inventor of CHLORODYNE hat the story of the Defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent Hospital Physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne, that they prescribe it largely, and mean no other than Dr. Browne's.—*The Times*, July 12, 1864.

The Public, therefore, are cautioned against using any other than

DR. J. COLLIS BROWNE'S CHLORODYNE

REMEDIA, USES AND ACTION.

THIS INVALUABLE REMEDY produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while Medical men extol its virtues most extensively using it in great quantities in the following diseases:—

Diseases in which it is found eminently useful—Cholera, Dysentery, Diarrhœa, Colics, Coughs, Asthma, Rheumatism, Neuralgia, Cough, Cramp, Hysteria, &c.

EXTRACTS FROM MEDICAL OPINIONS.

The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet* Dec. 31, 1864.

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma and Dysentery. To it I fairly owe my restoration to health after 18 month's severe suffering, and when other remedies had failed."

Dr. Lowe, Medical Missionary in India, reports [Dec. 1865] that nearly every case of Cholera in which Dr. J. Collis Browne's Chlorodyne was administered the patient recovered.

Extract from *Medical Times*, Jan. 12, 1866.—"Chlorodyne is prescribed by scores of orthodox medical practitioners. Of course it would not thus be singularly popular did it not 'supply a want and fill a place.'"

Extract from the General Board of Health, London, as to its efficacy in Cholera.—"So strong are we convinced of the immense value of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

Beware of spurious and dangerous compounds sold as CHLORODYNE, from which frequent fatal results have followed.

See leading article, *Pharmaceutical Journal* Aug. 1, 1868, which states that Dr. J. Collis Browne was the Inventor of Chlorodyne; that it is always right to use his preparation when Chlorodyne is ordered.

CAUTION.—None genuine without the words "Dr. J. Collis Browne" on the Government stamp Overwhelming medical testimony accompanies each bottle.

LEA and PERRIN'S
Celebrated

WORCESTERSHIRE SAUCE

Declared by Connoisseurs to be
THE ONLY GOOD SAUCE

CAUTION AGAINST FRAUD.

The success of his most delicious and unrivalled Condiment having caused certain dealers to apply the name of "Worcestershire Sauce" to their own inferior compounds, the Public is hereby informed that the only way to secure the genuine is to

Ask for
LEA and PERRINS' SAUCE,
And to see that their names are upon the "Wrapper, Labels, Stopper and Bottle."

Some of the foreign markets having been supplied with a spurious Worcestershire Sauce, upon the wrapper and labels of which the names of Lea and Perrins have been forged, L. and P. give notice that they have furnished their correspondents with power of attorney to take instant proceedings against Manufacturers and Vendors of such, or any other imitations by which their right may be infringed.

Ask for
LEA and PERRINS' SAUCE,
And see Name on Wrapper, Label, Bottle, and Stopper.

Wholesale and for Export by the Proprietors Worcester; Crosse and Blackwell, London, &c. and by Grocers and Oilmen universally.

To be obtained of

BETTS'S CAPSULE PATENTS.—To prevent Infringements Notice is hereby given, that BETTS'S NAME is on every Capsule he makes for the principal merchants in England and France, thus enabling vendor, purchaser, and consumer, not only to identify the genuineness of the Capsule, but likewise the contents of the vessel to which it is applied. The Lord Chancellor, in his judgment, on the 8th of February, 1868, said that the Capsules are not used merely for the purpose of the ornament, but that they are serviceable in protecting the wine from injury and insuring its genuineness.

Ferruginous Gin

COMPOSED OF THE
FINEST TONIC INGREDIENTS
SUCH AS
QUININE
BY
J. FERD. NAGEL,
HAMBURG,
INVENTOR AND SOLE MANUFACTURER OF THE FERRUGINOUS GIN.

J. FERD. NAGEL'S ferruginous Gin does not belong to that class of wonderful remedies which are being sold at exorbitant prices: on the contrary, the exceedingly moderate price places this most efficacious and valuable preparation within the easy reach of everybody. The ferruginous Gin is not intended for all possible maladies and ailments, but is a simple tonic, imparting to it just the quantity of iron necessary for the growth and sustenance of the body.

The medical testimonial treating upon the excellent qualities of this invigorating preparation, runs thus—"The ferruginous Gin having proved highly efficacious in many cases of scarcity of blood and nervous ailments, Mr. S. Ferd Nagel has applied himself to the task of preparing it, has succeeded in composing a preparation which taken alone or with the admixture of Soda, Selters or other effervescent waters, is not only agreeable to the taste, but extremely beneficial in its effects upon the stomach and the whole system. The ferruginous Gin containing besides the best vegetable Bitters (China Root, &c.), may be taken even by people of delicate constitution before and after dinner in doses varying from 2 to 4 tablespoons full,—100 parts ferruginous Gin contain 0,12 parts iron oxyd."

The ferruginous Gin may be recommended as an admirable cure for Green-Sickness, nervous ailments of all kinds, general debility, Fluor albus; it purifies the blood, creates appetite, promotes digestion and contains every ingredient necessary for the development and sustenance of the body. The excellent process adopted in the preparation renders it extremely mild in its operation, and it will be found valuable in imparting to the system just the quantity of iron required for the well being of the body.

Mr. J. Ferd. Nagel's ferruginous Gin was first prepared by him in the year 1860, and has since become a general favorite.

This ferruginous Gin has been used extensively and with eminent success as a renovator of the nervous system, and thousands have derived the greatest benefit from its use, for it not only sets right any irregularity of the stomach, liver, bowels and kidneys, but has also proved highly valuable against cholera.
